

Remarks

In an Office Action May 23, 2005, the Examiner rejects claim 1 and objects to the specification. In response to the Office Action, Applicant amends claim 1 and the specification. In light of these amendments Applicant respectfully requests that the rejection of claim 1 be removed and the application be allowed.

Claim 1 is amended to remove limitations that are not part of the bus architecture. Thus, claim 1 differs from the claims in the other issued patent. Thus Applicant respectfully requests the 35 U.S.C §101 be removed and claim 1 be allowed.

Applicant has also corrected typographical and editorial errors found in the specification and abstract. Thus, Applicant respectfully requests that objections to the specification be removed and the application be allowed.

If the Examiner has any questions regarding this application or this response, the Examiner is requested to telephone the undersigned at 775-586-9500.

Respectfully submitted,
